What is 21st Century Education? It is flexible, creative, challenging, and complex. It addresses a rapidly changing world filled with fantastic new challenges as well as exciting new possibilities. At St Mary MacKillop School, we recognize the critical need for developing 21st century skills. However, we also believe that authentic education addresses the "whole child", including spiritual growth. As our world changes, so must education! Technology is a big part of this change. The students here at St Mary MacKillop, in Years 4, 5 & 6, create and learn with the use of a 1:1 laptop device, to develop the skills and knowledge needed for our ever-changing world.

Our curriculum is connected to students’ interests, experiences, talents and the real world. Learning experiences and a variety of technologies are used to enhance the learning of the students at St Mary MacKillop. A Twenty-first century curriculum provides opportunities for students to connect to the community – locally, state, nationally and globally. When entering our classrooms you will see students collaborating both with their peers and on a global level.

The curriculum at St Mary MacKillop incorporates opportunities to develop higher order thinking skills, multiple intelligences, technology and multimedia through challenging and creative real-world problems.

Our teacher’s help students turn information into knowledge, and knowledge into wisdom and instil in our learners a curiosity, which is fundamental to lifelong learning.
